

New Era High School, Panchgani

Assignment 2

Class VII

Subject	Mathematics
CHAPTER	Lines and angles
TIMELINE	2 nd Week (May 4 to May 9, 2020)
Topics	<ul style="list-style-type: none">• Introduction (Recall- point, line, line segment)• Angles• Related angles (Complementary angles, supplementary angles, adjacent angles, linear pair vertical angles)• Transversal• Angles made by transversal.• Transversal of parallel lines• Checking for parallel lines
Activity	<p>Activity 1</p> <ul style="list-style-type: none">• On a blank page draw randomly 10 points such that not more than three points should be in a line.• Name the points with capital letters from A to J.• Join any five pairs of points with different colour pens.(e.g. Join A and G, F and I etc.)• Observe the diagram formed and name the following<ol style="list-style-type: none">a) Points which are not joint to any other point.b) Line segmentc) Triangled) Quadrilateral <p>Activity 2</p> <ul style="list-style-type: none">• Observe around you; list the things which form angles and angle pairs like complementary and supplementary angles. <p>Activity 3</p> <p>Use match sticks, glue, colour pens and blank paper</p> <ul style="list-style-type: none">• Stick match sticks to make parallel lines and its transversal• Use colour pens to show different angle pairs in individual diagram <p>Example.</p>

	
Moral Value	<p>The two points are at a distance still with the help of a line a connection is made and a geometrical figure can be formed. Similarly, though we are locked down at home our love and care for our near and dear ones can create a connection between them and us with the help of technology.</p>
Submission	<p>Students should solve the Assignment on a paper and submit its scanned copy by 9th May 2020. For the queries, you may contact me on sanket.dhoke@nehs.in The hard copy to be submitted as and when you report to the school. Please note the above activities are part of your internal assessment and it is mandatory.</p>
Resource	<p>Class VII text book of Mathematic by N.C.E.R.T To download the textbook click the link given below http://ncert.nic.in/textbook/textbook.htm?gemh1=0-15</p>
Questions	<ol style="list-style-type: none"> 1. Draw one example each of the following <ol style="list-style-type: none"> a) Acute angle b) Obtuse angle c) Straight angle d) Right angle 2. Find the complementary angle of the following <ol style="list-style-type: none"> a) 42° b) 23° 3. Find the supplementary angle of the following <ol style="list-style-type: none"> a) 110° b) 45° 4. Find which of the following are complementary, supplementary or none <ol style="list-style-type: none"> a) 26° and 64° b) 170° and 25° c) 145° and 45° d) 115° and 65° e) 33° and 57° 5. Observe the figure below and answer the questions given :

- a) Name the parallel line
- b) Name the transversal line
- c) Name the pair of angles which are equal and form a pattern of “Z”, what are they called?
- d) Name the pair of angles are equal and form a pattern of “F”, What are they called?
- e) Name the complementary angle of $\angle GHF$ and $\angle AGC$

Subject Teacher: Sanket Dhoke
