

NEW ERA HIGH SCHOOL , PANCHGANI

CLASS- 10TH ABC

ASSIGNMENT -2

Subject –Art & Craft

Topic Sub Topic	Basic / shading 3D ball
Time line	2 week (3may to 9 th May 2020)
Objective	3D drawing simply means to depict something that has volume or space and this create s the illusions of hight, width and depth in an image,when it viewed from a particular angle
Activities'	How to draw a shaded sphere ? Step1 Draw a hollow circle with light lines you can use a pair of compasses Step 2 Choose a light source for this sphere . the light source in this example is on the upper left , some what in front of the page (or behind the viewer) Steps 3 Begin shading starts opposite the light source and move inwards . the darkest area will be furthest from the light source .create circle or partial circles of equal value (darkness) Steps 4 As you move towards the light source , fill the circle with less and less pressure , heavier on the dark area , lighter on the light area . you can leave around spot nearest the light source the colour of the white page Step 5 use your finger or tortillon to blend the shading and add a shadow. Notice how the circle now appears spherical with depth .
Suggested media	Pencil shading – pencil no. 2B , 4B, 6B, 8B , 10B,. Colour pencil – use the colour pencil light tone to dark tone Poster colour – only black & white
